## Настройка github pages

The screenshot shows the GitHub Pages settings page for a repository named 'projectarch'. The left sidebar contains a navigation menu with options: General, Access, Collaborators, Moderation options, Code and automation, Branches, Tags, Rules, Actions, Webhooks, Environments, Codespaces, Pages (highlighted), Security, Code security, Deploy keys, and Secrets and variables. The main content area is titled 'GitHub Pages' and includes a description: 'GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.' Below this is the 'Build and deployment' section, which has a 'Source' dropdown menu set to 'Deploy from a branch'. A tooltip is visible over the 'Deploy from a branch' option, showing 'GitHub Actions' as the selected method, with a description: 'Best for using frameworks and customizing your build process'. Other options in the dropdown include 'Deploy from a branch' (checked) and 'Classic Pages experience'. The 'Visibility' section is also visible, with a 'GitHub Enterprise' link and a description: 'With a GitHub Enterprise account, you can restrict access to your GitHub Pages site by publishing it privately. You can use privately published sites to share your internal documentation or knowledge base with members of your enterprise. You can try GitHub Enterprise risk-free for 30 days. Learn more about the visibility of your GitHub Pages site.' A 'Start free for 30 days' button is present. The bottom right corner of the screenshot shows a small video feed of a person.
